PROFILE

I am a blockchain builder and crypto community participant with deep experience exploring decentralized technologies since 2020. I focus on turning ideas into functional on-chain products that combine technical integrity with real user value.

I ship products across ecosystems (including LitChess on LitVM), contribute to on-chain development with LitecoinVM and IOPn, and engage in builder programs, ambassador-style community work, and collaborative Web3 projects. Interests: blockchain infrastructure, DeFi, prediction markets, on-chain gaming, EVM and Solana, discipline and risk management, and Discord tools that deliver real utility.

I favor clean, iterative shipping with practical tools and AI assistance for rapid prototyping, without sacrificing production quality.

KEY HIGHLIGHT

2nd Place — Track 1 · BNB Hack: AI Trading Agent Edition (2026)

Co-hosted by BNB Chain × CoinMarketCap × Trust Wallet. Project: Genesis — self-custody autonomous trading agent (CMC signal fusion, hard risk rules, TWAK / PancakeSwap execution, Strategy Skill generator). Track 1 prize pool \$24,000. Official announcement: x.com/BNBChainDevs/status/2074807300632858776

PRODUCTS I BUILT

Genesis — AI Autonomous Trading Agent

2nd place Track 1 at BNB Hack AI Trading Agent Edition. Self-custody agent with CMC MCP signals, risk manager veto, TWAK local signing, FastAPI dashboard, Track 2 strategy skills. Stack: Python, CMC MCP, TWAK, Grok/LLM, FastAPI. Repo: github.com/rishu4436/Genesis

LitChess — On-chain Chess (LitVM)

Decentralized chess dApp on LitVM with on-chain escrow betting (zkLTC), ranked play, practice vs AI, and transparent settlement. Stack: Solidity, Next.js, wagmi, Hardhat, chess.js. Live: litchess.in · github.com/rishu4436/litchess

OPN RewardVault — Merkle Rewards (OPN Chain)

On-chain reward distribution with Merkle proofs for giveaways, bounties, and campaign dashboard. Stack: Solidity, Hardhat, Next.js, wagmi, merkle-tree.js. Live: opn-rewardvault-frontend.vercel.app · github.com/rishu4436/opn-rewardvault

MARKETS I PARTICIPATE IN (AS USER)

Qwertí — Role: Cryptan

DeFAI aggregator. TGE planned Q3. Referral: app.qwertí.ai/?ref=146-41077 · Site: qwerti.ai · Discord: discord.gg/SHR3xUaERf

Pieverse — Role: User

TGE completed. Earned: \$59. Site: pieverse.io

AllScale — Role: Verified

TGE not announced. Referral: app.allscale.io/s/MOvrBWL · Site: allscale.io · Discord: discord.gg/brrNy4Z8Hp

TermMax — Role: Sentinel

Term Structure Finance (BNB alpha). TGE planned Q3. Referral: app.termmax.ts.finance/alpha/call-put?ref=V4VB6D&chain=bnb · Site: ts.finance · Discord: discord.gg/V32HVv5Rgz

COMMUNITY RECOGNITION

- Qwert (Sunny): Shoutout for activity, helping community, events — won Legend role.
- Qwert (Sir Glimor): Congrats as first Qwertian in server — @RISHABH | QWERTI.
- Qwert (reeb): “My fvrt in qwert.”
- LitChess (BenDoverr): “nice GUI” / profile looks really good.
- BNB Chain Developers: Official Track 1 winners post — Genesis 2nd place.

SKILLS & STACK

Solidity · Hardhat · Next.js · TypeScript · React · wagmi/viem · RainbowKit · Python · LLM agents · CMC MCP · TWAK · Merkle trees · Tailwind · Framer Motion · Community ops · Discord systems · AI-assisted prototyping

OPEN TO

Ambassador programs · builder initiatives · collaborative Web3 projects · on-chain products · LitVM / OPN / BNB ecosystem work.
